Fund Summary

Fund/Class:

VIP Investment Grade Bond Portfolio/Initial Class, Service Class, Service Class 2

Investment Objective

The fund seeks as high a level of current income as is consistent with the preservation of capital.

owner, buy and hold interests in a separate account that invests in shares of the fund. The table does not include any fees or other expenses of any variable annuity or variable life insurance product; if it did, overall fees and expenses would be higher.

Fee Table

The following table describes the fees and expenses that may be incurred, directly or indirectly, when you, as a variable product

Fees

(fees paid directly from your investment)

Not Applicable

Annual class operating expenses

(expenses that you pay each year as a % of the value of your investment)

	Initial Class	Service Class	Service Class 2
Management fee	0.32%	0.32%	0.32%
Distribution and/or Service (12b-1) fees	None	0.10%	0.25%
Other expenses	<u>0.11%</u>	<u>0.11%</u>	<u>0.11%</u>
Total annual operating expenses	0.43%	0.53%	0.68%

This **example** helps compare the cost of investing in the fund with the cost of investing in other mutual funds.

Let's say, hypothetically, that the annual return for shares of the fund is 5% and that the fees and the annual operating expenses for shares of the fund are exactly as described in the fee table. This example illustrates the effect of fees and expenses, but is not meant to suggest actual or expected fees and expenses or returns,

all of which may vary. This example does not include any fees or other expenses of any variable annuity or variable life insurance product; if it did, overall expenses would be higher. For every \$10,000 invested, here's how much you, as a variable product owner, would pay in total expenses if all interests in a separate account that invests in shares of the fund were redeemed at the end of each time period indicated:

	Initial Class	Service Class	Service Class 2
1 year	\$ 44	\$ 54	\$ 69
3 years	\$ 138	\$ 170	\$ 218
5 years	\$ 241	\$ 296	\$ 379
10 years	\$ 542	\$ 665	\$ 847

Portfolio Turnover

The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 8% of the average value of its portfolio.

Principal Investment Strategies

- Normally investing at least 80% of assets in investment-grade debt securities (those of medium and high quality) of all types and repurchase agreements for those securities.
- Managing the fund to have similar overall interest rate risk to the Barclays Capital U.S. Aggregate Bond Index.

- Allocating assets across different market sectors and maturities.
- Investing in domestic and foreign issuers.
- Analyzing the credit quality of the issuer, security-specific features, current and potential future valuation, and trading opportunities to select investments.
- Potentially investing in lower-quality debt securities.
- Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives – such as swaps (interest rate, total return, and credit default) and futures contracts – and forward-settling securities, to adjust the fund's risk exposure.
- Investing in Fidelity's central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or investment disciplines).

Fund Summary – continued

Principal Investment Risks

- **Interest Rate Changes.** Interest rate increases can cause the price of a debt security to decrease.
- **Foreign Exposure.** Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from the U.S. market.
- **Prepayment.** The ability of an issuer of a debt security to repay principal prior to a security's maturity can cause greater price volatility if interest rates change.
- **Issuer-Specific Changes.** The value of an individual security or particular type of security can be more volatile than, and can perform differently from, the market as a whole. A decline in the credit quality of an issuer or a provider of credit support or a maturity-shortening structure for a security can cause the price of a security to decrease. Lower-quality debt securities (those of less than investment-grade quality) involve greater risk of default or price changes due to changes in the credit quality of the issuer.

Year-by-Year Returns

During the periods shown in the chart for Initial Class:

Highest Quarter Return

Lowest Quarter Return

Service Class 2

Barclays Capital[®] U.S. Aggregate Bond Index
(reflects no deduction for fees, expenses, or taxes)

	Past 1 year	Past 5 years	Past 10 years
Initial Class	7.80%	5.62%	5.85%
Service Class	7.68%	5.53%	5.74%
Service Class 2	7.55%	5.38%	5.59%
Barclays Capital [®] U.S. Aggregate Bond Index (reflects no deduction for fees, expenses, or taxes)	6.54%	5.80%	5.84%

Investment Advisers

Fidelity Management & Research Company (FMR) is the fund's manager. Fidelity Investments Money Management, Inc. (FIMM) and other investment advisers serve as sub-advisers for the fund.

The value of lower-quality debt securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.

- **Leverage Risk.** Leverage can increase market exposure, magnify investment risks, and cause losses to be realized more quickly.

You could lose money by investing in the fund.

Performance

The following information is intended to help you understand the risks of investing in the fund. The information illustrates the changes in the performance of the fund's shares from year to year and compares the performance of the fund's shares to the performance of a securities market index over various periods of time. The index description appears in the Additional Information about the Index section of the prospectus. Returns for shares of the fund do not include the effect of any sales charges or other expenses of any variable annuity or variable life insurance product; if they did, returns for shares of the fund would be lower. Past performance is not an indication of future performance.

Portfolio Manager(s)

Ford O'Neil (portfolio manager) has managed the fund since October 2001.

Purchase and Sale of Shares

Only Permitted Accounts, including separate accounts of insurance companies and qualified funds of funds that have signed the appropriate agreements with the fund, if applicable, can buy or sell shares of the fund. Insurance companies offer variable annuity and variable life insurance products through separate accounts. A qualified fund of funds is an eligible insurance-dedicated mutual fund that invests in other mutual funds.

Permitted Accounts – not variable product owners – are the shareholders of the fund. Variable product owners hold interests in separate accounts, including separate accounts that are shareholders of qualified funds of funds. The terms of the offering of interests in separate accounts are included in the variable annuity or variable life insurance product prospectus.

The price to buy one share of Initial Class, Service Class, or Service Class 2 is its net asset value per share (NAV). Shares will be bought at the NAV next calculated after an order is received in proper form.

The price to sell one share of Initial Class, Service Class, or Service Class 2 is its NAV. Shares will be sold at the NAV next calculated after an order is received in proper form.

The fund is open for business each day the New York Stock Exchange (NYSE) is open.

The fund has no minimum investment requirement.

Tax Information

Variable product owners seeking to understand the tax consequences of their investment should consult with their tax advisers or the insurance company that issued their variable product, or refer to their variable annuity or variable life insurance product prospectus. Insurance company separate accounts generally do not pay tax on dividends or capital gain distributions from the fund.

Payments to Broker-Dealers and Other Financial Intermediaries

The fund, FMR, Fidelity Distributors Corporation (FDC), and/or their affiliates may pay intermediaries, including insurance companies and their affiliated broker-dealers and service-providers (who may be affiliated with FMR or FDC), for the sale of fund shares and related services. These payments may create a conflict of interest by influencing your intermediary and your investment professional to recommend the fund over another investment. Ask your investment professional or visit your intermediary's web site for more information.

Fund Basics

Investment Details

Investment Objective

The fund seeks as high a level of current income as is consistent with the preservation of capital.

Principal Investment Strategies

FMR normally invests at least 80% of the fund's assets in investment-grade debt securities (those of medium and high quality) of all types and repurchase agreements for those securities.

FMR uses the Barclays Capital U.S. Aggregate Bond Index as a guide in structuring the fund and selecting its investments. FMR manages the fund to have similar overall interest rate risk to the index.

FMR considers other factors when selecting the fund's investments, including the credit quality of the issuer, security-specific features, current valuation relative to alternatives in the market, short-term trading opportunities resulting from market inefficiencies, and potential future valuation. In managing the fund's exposure to various risks, including interest rate risk, FMR considers, among other things, the market's overall risk characteristics, the market's current pricing of those risks, information on the fund's competitive universe and internal views of potential future market conditions.

FMR allocates the fund's assets among different market sectors (for example, corporate, asset-backed, or government securities) and different maturities based on its view of the relative value of each sector or maturity.

FMR may invest the fund's assets in securities of foreign issuers in addition to securities of domestic issuers.

FMR may engage in transactions that have a leveraging effect on the fund, including investments in derivatives, regardless of whether the fund may own the asset, instrument or components of the index underlying the derivative, and forward-settling securities. FMR may invest a significant portion of the fund's assets in these types of investments. The fund's derivative investments may include interest rate swaps, total return swaps, credit default swaps, and futures contracts (both long and short positions) on securities and indexes. Depending on FMR's outlook and market conditions, FMR may engage in these transactions to increase or decrease the fund's exposure to changing security prices, interest rates, credit qualities, or other factors that affect security values, or to gain or reduce exposure to an asset, instrument, or index.

FMR may also invest up to 10% of the fund's assets in lower-quality debt securities.

To earn additional income for the fund, FMR may use a trading strategy that involves selling (or buying) mortgage securities and simultaneously agreeing to purchase (or sell) mortgage securities on a later date at a set price. This trading strategy may increase interest rate exposure and result in an increased portfolio turnover rate which increases transaction costs and may increase taxable gains.

FMR uses central funds to help invest the fund's assets. Central funds are specialized investment vehicles managed by FMR affiliates

that are designed to be used by Fidelity funds. Fidelity uses them to invest in particular security types or investment disciplines; for example, rather than buy bonds directly, the fund may invest in a central fund that buys bonds. Fidelity does not charge any additional management fees for central funds. Central funds offer exposure to some or all of the following types of investment-grade and lower-quality debt securities: corporate bonds, mortgage and other asset-backed securities, floating rate loans, and BB-rated securities. Central funds may also focus on other types of securities.

If FMR's strategies do not work as intended, the fund may not achieve its objective.

Description of Principal Security Types

Debt securities are used by issuers to borrow money. The issuer usually pays a fixed, variable, or floating rate of interest, and must repay the amount borrowed, usually at the maturity of the security. Some debt securities, such as zero coupon bonds, do not pay current interest but are sold at a discount from their face values. Debt securities include corporate bonds, government securities, repurchase agreements, mortgage and other asset-backed securities, and other securities that FMR believes have debt-like characteristics, including hybrids and synthetic securities.

A *repurchase agreement* is an agreement to buy a security at one price and a simultaneous agreement to sell it back at an agreed-upon price.

Derivatives are investments whose values are tied to an underlying asset, instrument, or index. Derivatives include futures, options, and swaps, such as interest rate swaps (exchanging a floating rate for a fixed rate), total return swaps (exchanging a floating rate for the total return of a security or index) and credit default swaps (buying or selling credit default protection).

Forward-settling securities involve a commitment to purchase or sell specific securities when issued, or at a predetermined price or yield. When a fund does not already own or have the right to obtain securities equivalent in kind and amount, a commitment to sell securities is equivalent to a short sale. Payment and delivery take place after the customary settlement period.

Central funds are special types of investment vehicles created by Fidelity for use by Fidelity funds and other advisory clients. Central funds incur certain costs related to their investment activity (such as custodial fees and expenses), but do not pay additional management fees to Fidelity. The investment results of the portions of the fund's assets invested in the central funds will be based upon the investment results of those funds.

Principal Investment Risks

Many factors affect the fund's performance. The fund's yield and share price change daily based on changes in interest rates and market conditions and in response to other economic, political, or financial developments. The fund's reaction to these developments will be affected by the types and maturities of securities in which the fund invests, the financial condition, industry and economic sector, and geographic location of an issuer, and the fund's level of

investment in the securities of that issuer. Unlike individual debt securities, which typically pay principal at maturity, the value of an investment in the fund will fluctuate. When you sell your shares they may be worth more or less than what you paid for them, which means that you could lose money by investing in the fund.

The following factors can significantly affect the fund's performance:

Interest Rate Changes. Debt securities have varying levels of sensitivity to changes in interest rates. In general, the price of a debt security can fall when interest rates rise and can rise when interest rates fall. Securities with longer maturities and mortgage securities can be more sensitive to interest rate changes. In other words, the longer the maturity of a security, the greater the impact a change in interest rates could have on the security's price. In addition, short-term and long-term interest rates do not necessarily move in the same amount or the same direction. Short-term securities tend to react to changes in short-term interest rates, and long-term securities tend to react to changes in long-term interest rates.

Foreign Exposure. Foreign securities and securities issued by U.S. entities with substantial foreign operations can involve additional risks relating to political, economic, or regulatory conditions in foreign countries. These risks include fluctuations in foreign currencies; withholding or other taxes; trading, settlement, custodial, and other operational risks; and the less stringent investor protection and disclosure standards of some foreign markets. All of these factors can make foreign investments more volatile and potentially less liquid than U.S. investments. In addition, foreign markets can perform differently from the U.S. market.

Prepayment. Many types of debt securities, including mortgage securities, are subject to prepayment risk. Prepayment risk occurs when the issuer of a security can repay principal prior to the security's maturity. Securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. In addition, the potential impact of prepayment features on the price of a debt security can be difficult to predict and result in greater volatility.

Issuer-Specific Changes. Changes in the financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can increase the risk of default by an issuer or counterparty, which can affect a security's or instrument's credit quality or value. Entities providing credit support or a maturity-shortening structure also can be affected by these types of changes. If the structure of a security fails to function as intended, the security could decline in value. Lower-quality debt securities (those of less than investment-grade quality) tend to be particularly sensitive to these changes.

Lower-quality debt securities involve greater risk of default or price changes due to changes in the credit quality of the issuer. The value of lower-quality debt securities often fluctuates in response to company, political, or economic developments and can decline

significantly over short as well as long periods of time or during periods of general or regional economic difficulty.

Leverage Risk. Derivatives, forward-settling securities, and short sale transactions involve leverage because they can provide investment exposure in an amount exceeding the initial investment. Leverage can magnify investment risks and cause losses to be realized more quickly. A small change in the underlying asset, instrument, or index can lead to a significant loss. Assets segregated to cover these transactions may decline in value and are not available to meet redemptions. Forward-settling securities and short sale transactions also involve the risk that a security will not be issued, delivered, available for purchase, or paid for when anticipated. An increase in the market price of securities sold short will result in a loss. Government legislation or regulation could affect the use of these transactions and could limit a fund's ability to pursue its investment strategies.

In response to market, economic, political, or other conditions, FMR may temporarily use a different investment strategy for defensive purposes. If FMR does so, different factors could affect the fund's performance and the fund may not achieve its investment objective.

Fundamental Investment Policies

The following policy is fundamental, that is, subject to change only by shareholder approval:

The fund seeks as high a level of current income as is consistent with the preservation of capital.

Shareholder Notice

The following policy is subject to change only upon 60 days' prior notice to shareholders:

The fund normally invests at least 80% of its assets in investment-grade debt securities of all types and repurchase agreements for those securities.

Valuing Shares

The fund is open for business each day the NYSE is open.

A class's NAV is the value of a single share. Fidelity normally calculates each class's NAV as of the close of business of the NYSE, normally 4:00 p.m. Eastern time. The fund's assets normally are valued as of this time for the purpose of computing each class's NAV.

NAV is not calculated and the fund will not process purchase and redemption requests submitted on days when the fund is not open for business. The time at which shares are priced and until which purchase and redemption orders are accepted may be changed as permitted by the Securities and Exchange Commission (SEC).

To the extent that the fund's assets are traded in other markets on days when the fund is not open for business, the value of the fund's assets may be affected on those days. In addition, trading in some of the fund's assets may not occur on days when the fund is open for business.

Fund Basics – continued

The fund's assets are valued primarily on the basis of information furnished by a pricing service or market quotations. Certain short-term securities are valued on the basis of amortized cost. If market quotations or information furnished by a pricing service is not readily available or does not accurately reflect fair value for a security or if a security's value has been materially affected by events occurring before the fund's pricing time but after the close of the exchange or market on which the security is principally traded, that security will be valued by another method that FMR believes accurately reflects fair value in accordance with the fund's fair value pricing policies. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume before the fund calculates its NAV. These arbitrage opportunities may enable short-term traders to dilute the NAV of long-term investors. Securities trading in overseas markets presents time zone arbitrage opportunities when events affecting portfolio security values occur after the close of the overseas market but prior to the close of the U.S. market. Fair value pricing will be used for high yield debt and floating rate loans when available pricing information is determined to be stale or for other reasons not to accurately reflect fair value. To the extent the fund invests in other open-end funds, the fund will calculate its NAV using the NAV of the underlying funds in which it invests as described in the underlying funds' prospectuses. The fund may invest in other Fidelity funds that use the same fair value pricing policies as the fund or in Fidelity money market funds. A security's valuation may differ depending on the method used for determining value. Fair valuation of a fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the fund's NAV by short-term traders. While the fund has policies regarding excessive trading, these too may not be effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts.

Shareholder Information

Additional Information about the Purchase and Sale of Shares

The fund may reject for any reason, or cancel as permitted or required by law, any purchase orders, including transactions deemed to represent excessive trading, at any time.

Excessive trading of fund shares can harm variable product owners in various ways, including reducing the returns to long-term variable product owners by increasing costs paid by the fund (such as brokerage commissions), disrupting portfolio management strategies, and diluting the value of the shares in cases in which fluctuations in markets are not fully priced into the fund's NAV.

Purchase and redemption transactions submitted to the fund by Permitted Accounts reflect the transactions of multiple variable product owners whose individual transactions are often not disclosed to the fund, making it difficult to determine whether an individual variable product owner is engaging in excessive trading. Excessive trading in Permitted Accounts is likely to go undetected by the fund and may increase costs to the fund and disrupt its portfolio management.

The Board of Trustees has adopted policies designed to discourage excessive trading of fund shares. Under these policies, insurance companies will be permitted to apply the fund's excessive trading policy (described below), or their own excessive trading policy if approved by FMR. In these cases, the fund will typically not request or receive individual account data but will rely on the insurance company to monitor trading activity in good faith in accordance with its or the fund's policies. Reliance on insurance companies increases the risk that excessive trading may go undetected. For other insurance companies, the fund will monitor trading activity at the Permitted Account level to attempt to identify disruptive trades. The fund may request variable product owner transaction information, as frequently as daily, from any insurance company at any time, and may apply the fund's policy to transactions that exceed thresholds established by the Board of Trustees. The fund may prohibit purchases of fund shares by an insurance company or by some or all of any Permitted Accounts. There is no assurance that FMR will request data with sufficient frequency to detect or deter excessive trading in Permitted Accounts effectively.

Under the excessive trading policy for the fund, excessive trading activity is measured by the number of roundtrip transactions in a variable product owner's account. A roundtrip transaction occurs when a variable product owner sells fund shares within 30 days of the purchase date. For purposes of the fund's policy, exchanges are treated as a sale and a purchase.

Variable product owners with two or more roundtrip transactions in a single fund within a rolling 90-day period will be blocked from making additional purchases of the fund or limited to trading by U.S. mail for 85 days. Variable product owners with four or more roundtrip transactions across all Fidelity funds within any rolling 12-month period will be blocked from making additional purchases for at least 85 days or limited to trading by U.S. mail for 12 months across all Fidelity funds. Any roundtrip within 12 months of the

expiration of a multi-fund block or U.S. mail restriction will initiate another multi-fund block or a 12-month U.S. mail restriction. Repeat offenders may be subject to long-term or permanent U.S. mail restrictions on purchases in any account under the variable product owner's control at any time. In addition to enforcing these roundtrip limitations, the fund may in its discretion restrict, reject, or cancel any purchases that, in FMR's opinion, may be disruptive to the management of the fund or otherwise not be in the fund's interests. The administration and effectiveness of these sanctions will in large part depend on the rights, ability, and willingness of insurance companies to impose the sanctions.

The fund's excessive trading policy does not apply to transactions of \$5,000 or less, or transactions which have been demonstrated to the fund to be (i) systematic withdrawal and/or contribution programs, (ii) mandatory retirement distributions, (iii) transactions initiated by a retirement plan sponsor, sponsors of certain other employee benefit plans or qualified fund of fund(s), or (iv) transactions in certain company-owned accounts. A qualified fund of fund(s) must demonstrate that it has an investment strategy coupled with policies designed to control frequent trading that have been determined by the fund's Treasurer to be reasonably effective.

The fund's policies are separate from any insurance company policies and procedures applicable to variable product owner transactions. The variable annuity or variable life insurance product prospectus will contain a description of the insurance company's policies and procedures, if any, with respect to excessive trading. If you purchase or sell fund shares through an insurance company, you may wish to contact the insurance company to determine the policies applicable to your account.

The fund reserves the right at any time to restrict purchases or impose conditions that are more restrictive on excessive or disruptive trading than those stated in this prospectus. The fund's Treasurer is authorized to suspend the fund's policies during periods of severe market turbulence or national emergency. The fund reserves the right to modify its policies at any time without prior notice.

The fund does not knowingly accommodate frequent purchases and redemptions of fund shares by investors, except to the extent permitted by the policies described above.

There is no assurance that the fund's excessive trading policy will be effective, or will successfully detect or deter excessive or disruptive trading.

The price to buy one share of Initial Class, Service Class, or Service Class 2 is its NAV. Initial Class, Service Class, and Service Class 2 shares are sold without a sales charge.

Shares will be bought at the NAV next calculated after an order is received in proper form.

The fund has authorized certain intermediaries to accept orders to buy shares on its behalf. When authorized intermediaries receive an order in proper form, the order is considered as being placed with the fund, and shares will be bought at the NAV next calculated after the order is received by the authorized intermediaries. Orders

Shareholder Information – continued

by qualified funds of funds, including mutual funds for which FMR or an affiliate serves as investment manager, will be treated as received by the fund at the same time that the corresponding orders are received in proper form by the funds of funds.

The fund may stop offering shares completely or may offer shares only on a limited basis, for a period of time or permanently.

Under applicable anti-money laundering regulations and other federal regulations, purchase orders may be suspended, restricted, or canceled and the monies may be withheld.

The price to sell one share of Initial Class, Service Class, or Service Class 2 is its NAV.

Shares will be sold at the NAV next calculated after an order is received in proper form. Normally, redemptions will be processed by the next business day, but it may take up to seven days to pay the redemption proceeds if making immediate payment would adversely affect the fund.

The fund has authorized certain intermediaries to accept orders to sell shares on its behalf. When authorized intermediaries receive an order in proper form, the order is considered as being placed with the fund, and shares will be sold at the NAV next calculated after the order is received by the authorized intermediaries. Orders by qualified funds of funds, including mutual funds for which FMR or an affiliate serves as investment manager, will be treated as received by the fund at the same time that the corresponding orders are received in proper form by the funds of funds.

Redemptions may be suspended or payment dates postponed when the NYSE is closed (other than weekends or holidays), when trading on the NYSE is restricted, or as permitted by the SEC.

Redemption proceeds may be paid in securities or other property rather than in cash if FMR determines it is in the best interests of the fund.

Under applicable anti-money laundering regulations and other federal regulations, redemption requests may be suspended, restricted, canceled, or processed and the proceeds may be withheld.

The fund offers its shares to Permitted Accounts that may be affiliated or unaffiliated with FMR and/or each other. The fund currently does not foresee any disadvantages to variable product owners arising out of the fact that the fund offers its shares to separate accounts of insurance companies that offer variable annuity and variable life insurance products (as well as other Permitted Accounts). Nevertheless, the Board of Trustees that oversees the fund intends to monitor events to identify any material irreconcilable conflicts that may possibly arise and to determine what action, if any, should be taken in response.

Variable product owners may be asked to provide additional information in order for Fidelity to verify their identities in accordance with requirements under anti-money laundering regulations. Accounts may be restricted and/or closed, and the monies withheld, pending verification of this information or as otherwise required under these and other federal regulations.

Dividends and Capital Gain Distributions

The fund earns interest, dividends, and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions.

The fund normally pays dividends and capital gain distributions at least annually, in February.

Dividends and capital gain distributions will be automatically reinvested in additional shares of the same class of the fund.

Fund Services

Fund Management

The fund is a mutual fund, an investment that pools shareholders' money and invests it toward a specified goal.

FMR is the fund's manager. The address of FMR and its affiliates, unless otherwise indicated below, is 82 Devonshire Street, Boston, Massachusetts 02109.

As of December 31, 2010, FMR had approximately \$1.2 billion in discretionary assets under management.

As the manager, FMR has overall responsibility for directing the fund's investments and handling its business affairs.

FIMM serves as a sub-adviser for the fund. FIMM has day-to-day responsibility for choosing investments for the fund.

FIMM is an affiliate of FMR. As of December 31, 2010, FIMM had approximately \$606.9 billion in discretionary assets under management.

Other investment advisers assist FMR with foreign investments:

- Fidelity Management & Research (U.K.) Inc. (FMR U.K.), at 10 Paternoster Square, 4th Floor, London, EC4M 7LS, United Kingdom, serves as a sub-adviser for the fund. As of December 31, 2010, FMR U.K. had approximately \$16.1 billion in discretionary assets under management. FMR U.K. may provide investment research and advice on issuers based outside the United States and may also provide investment advisory services for the fund. FMR U.K. is an affiliate of FMR.

- Fidelity Management & Research (Hong Kong) Limited (FMR H.K.), at Floor 19, 41 Connaught Road Central, Hong Kong, serves as a sub-adviser for the fund. As of December 31, 2010, FMR H.K. had approximately \$2.7 billion in discretionary assets under management. FMR H.K. may provide investment research and advice on issuers based outside the United States and may also provide investment advisory services for the fund. FMR H.K. is an affiliate of FMR.

- Fidelity Management & Research (Japan) Inc. (FMR Japan), at Kamiyacho Prime Place, 1-17, Toranomon-4-Chome, Minato-ku, Tokyo, Japan, serves as a sub-adviser for the fund. FMR Japan was organized in 2008 to provide investment research and advice on issuers based outside the United States. FMR Japan may provide investment research and advice on issuers based outside the United States and may also provide investment advisory services for the fund. FMR Japan is an affiliate of FMR.

Ford O'Neil is portfolio manager of the fund, which he has managed since October 2001. He also manages other Fidelity funds. Since joining Fidelity Investments in 1990, Mr. O'Neil has worked as a research analyst and portfolio manager.

The statement of additional information (SAI) provides additional information about the compensation of, any other accounts managed by, and any fund shares held by Mr. O'Neil.

From time to time a manager, analyst, or other Fidelity employee may express views regarding a particular company, security,

industry, or market sector. The views expressed by any such person are the views of only that individual as of the time expressed and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. Any such views are subject to change at any time based upon market or other conditions and Fidelity disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Fidelity fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Fidelity fund.

The fund pays a management fee to FMR. The management fee is calculated and paid to FMR every month. The fee is calculated by adding a group fee rate to an individual fund fee rate, dividing by twelve, and multiplying the result by the fund's average net assets throughout the month.

The group fee rate is based on the average net assets of all the mutual funds advised by FMR. This rate cannot rise above 0.37%, and it drops as total assets under management increase.

For December 2010, the group fee rate was 0.12%. The individual fund fee rate is 0.20%.

The total management fee for the fiscal year ended December 31, 2010, was 0.32% of the fund's average net assets. Because the fund's management fee rate may fluctuate, the fund's management fee may be higher or lower in the future.

FMR pays FIMM, FMR U.K., FMR H.K., and FMR Japan for providing sub-advisory services.

The basis for the Board of Trustees approving the management contract and sub-advisory agreements for the fund is available in the fund's annual report for the fiscal period ended December 31, 2010.

FMR may, from time to time, agree to reimburse a class for, or waive, management fees and other expenses above a specified limit. FMR retains the ability to be repaid by a class if expenses fall below the specified limit prior to the end of the fiscal year.

Voluntary reimbursement or waiver arrangements can decrease expenses and boost performance.

As of February 28, 2011, approximately 27.42% of the fund's total outstanding shares was held by FMR affiliates.

Fund Distribution

The fund is composed of multiple classes of shares. All classes of the fund have a common investment objective and investment portfolio.

FDC distributes each class's shares.

Intermediaries, including insurance companies and their affiliated broker-dealers and service-providers (who may be affiliated with FMR or FDC), may receive from FMR, FDC, and/or their affiliates

Fund Services – continued

compensation for their services intended to result in the sale of class shares. This compensation may take the form of:

- distribution and/or service (12b-1) fees
- payments for additional distribution-related activities and/or shareholder services
- payments for educational seminars and training, including seminars sponsored by FMR or an affiliate, or by an intermediary

These payments are described in more detail in this section and in the SAI.

Initial Class has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the Investment Company Act of 1940 (1940 Act) that recognizes that FMR may use its management fee revenues, as well as its past profits or its resources from any other source, to pay FDC for expenses incurred in connection with providing services intended to result in the sale of Initial Class shares and/or support services that benefit variable product owners. FMR, directly or through FDC, may pay significant amounts to intermediaries that provide those services. Currently, the Board of Trustees of the fund has authorized such payments for Initial Class. Variable product owners should speak with their investment professionals to learn more about any payments their firms may receive from FMR, FDC, and/or their affiliates, as well as fees and/or commissions the investment professional charges. Variable product owners should also consult disclosures made by their investment professionals at the time of purchase.

Service Class has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. Under the plan, Service Class is authorized to pay FDC a 12b-1 (service) fee as compensation for providing support services that benefit variable product owners. Service Class may pay this 12b-1 (service) fee at an annual rate of 0.25% of its average net assets, or such lesser amount as the Trustees may determine from time to time. Service Class currently pays FDC a 12b-1 (service) fee at an annual rate of 0.10% of its average net assets throughout the month. Service Class's 12b-1 (service) fee rate may be increased only when the Trustees believe that it is in the best interests of variable product owners to do so.

Service Class 2 has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. Under the plan, Service Class 2 is authorized to pay FDC a 12b-1 (service) fee as compensation for providing support services that benefit variable product owners. Service Class 2 currently pays FDC a 12b-1 (service) fee at an annual rate of 0.25% of its average net assets throughout the month.

FDC may reallocate up to the full amount of these 12b-1 (service) fees to intermediaries (such as insurance companies, broker-dealers, and other service-providers), including its affiliates, for providing support services that benefit variable product owners.

If payments made by FMR to FDC or to intermediaries under Initial Class's Distribution and Service Plan were considered to be paid out of Initial Class's assets on an ongoing basis, they might increase

the cost of a shareholder's investment and might cost a shareholder more than paying other types of sales charges.

Any fees paid out of Service Class's or Service Class 2's assets on an ongoing basis pursuant to a Distribution and Service Plan will increase the cost of a shareholder's investment and may cost a shareholder more than paying other types of sales charges.

In addition, each Service Class and Service Class 2 plan specifically recognizes that FMR may make payments from its management fee revenue, past profits, or other resources to FDC for expenses incurred in connection with providing services intended to result in the sale of Service Class and Service Class 2 shares and/or support services that benefit variable product owners, including payments of significant amounts made to intermediaries that provide those services. Currently, the Board of Trustees of the fund has authorized such payments for Service Class and Service Class 2. Variable product owners should speak with their investment professionals to learn more about any payments their firms may receive from FMR, FDC, and/or their affiliates, as well as fees and/or commissions the investment professional charges. Variable product owners should also consult disclosures made by their investment professionals at the time of purchase.

No dealer, sales representative, or any other person has been authorized to give any information or to make any representations, other than those contained in this prospectus and in the related SAI, in connection with the offer contained in this prospectus. If given or made, such other information or representations must not be relied upon as having been authorized by the fund or FDC. This prospectus and the related SAI do not constitute an offer by the fund or by FDC to sell shares of the fund to or to buy shares of the fund from any person to whom it is unlawful to make such offer.

Appendix

Financial Highlights

The financial highlights tables are intended to help you understand each class's financial history for the past 5 years. Certain information reflects financial results for a single class share. The total returns in the table represent the rate that an investor would have

earned (or lost) on an investment in the class (assuming reinvestment of all dividends and distributions). This information has been audited by Deloitte & Touche LLP, independent registered public accounting firm, whose report, along with the fund's financial highlights and financial statements, is included in the fund's annual report. A free copy of the annual report is available upon request.

VIP Investment Grade Bond Portfolio – Initial Class					
Years ended December 31,	2010	2009	2008	2007	2006
Selected Per-Share Data

Distributions from net realized gain	(.145)	(.049)	(.010)	—	(.030)
Total distributions	(.621)	(1.136)	(.525)	(.534)	(.531)
Net asset value, end of period	\$ 12.83	\$ 12.48	\$ 11.84	\$ 12.76	\$ 12.76
Total Return^{A, B}	7.80%	15.72%	(3.25)%	4.35%	4.35%
Ratios to Average Net Assets^{D, F}					
Expenses before reductions	.43%	.45%	.43%	.43%	.44%
Expenses net of fee waivers, if any	.42%	.45%	.43%	.43%	.44%
Expenses net of all reductions	.42%	.45%	.43%	.43%	.44%
Net investment income	3.38%	4.19%	4.84%	4.88%	4.75%
Supplemental Data					
Net assets, end of period (000 omitted)	\$ 1,110,373	\$ 1,083,773	\$ 936,912	\$ 1,134,915	\$ 1,184,942
Portfolio turnover rate ^E	8%	3%	14%	2%	34%

^A Total returns do not reflect charges attributable to your insurance company's separate account. Inclusion of these charges would reduce the total returns shown.

^B Total returns would have been lower had certain expenses not been reduced during the periods shown.

^C Calculated based on average shares outstanding during the period.

^D Fees and expenses of the underlying Fidelity Central Funds are not included in the Fund's expense ratio. The Fund indirectly bears its proportionate share of the expenses of any underlying Fidelity Central Funds.

^E Amount does not include the portfolio activity of any underlying Fidelity Central Funds.

^F Expense ratios reflect operating expenses of the class. Expenses before reductions do not reflect amounts reimbursed by the investment adviser or reductions from expense offset arrangements and do not represent the amount paid by the class during periods when reimbursements or reductions occur. Expenses net of fee waivers reflect expenses after reimbursement by the investment adviser but prior to reductions from expense offset arrangements. Expenses net of all reductions represent the net expenses paid by the class. Fees and expenses of the underlying Fidelity Central Funds are not included in the Fund's expense ratio. The Fund indirectly bears its proportionate share of the expenses of any Fidelity Central Funds. Based on their most recent shareholder report date, the annualized expenses for the Fidelity VIP Investment Grade Central Fund and Fidelity Specialized High Income Central Fund were less than .01%.

IMPORTANT INFORMATION ABOUT OPENING A NEW ACCOUNT

To help the government fight the funding of terrorism and money laundering activities, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT ACT), requires all financial institutions to obtain, verify, and record information that identifies each person or entity that opens an account.

For variable product owners: When you open an account, you will be asked for your name, address, date of birth, and other information that will allow Fidelity to identify you. You may also be asked to provide documents that may help to establish your identity, such as your driver's license.

For insurance separate accounts: When you open an account, you will be asked for the name of the entity, its principal place of business and taxpayer identification number (TIN) and may be requested to provide information on persons with authority or control over the account such as name, residential address, date of birth and social security number. You may also be asked to provide documents, such as drivers' licenses, articles of incorporation, trust instruments or partnership agreements and other information that will help Fidelity identify the entity.

You can obtain additional information about the fund. A description of the fund's policies and procedures for disclosing its holdings is available in its SAI and on Fidelity's web sites. The SAI also includes more detailed information about the fund and its investments. The SAI is incorporated herein by reference (legally forms a part of the prospectus). The fund's annual and semi-annual reports also include additional information. The fund's annual report includes a discussion of the fund's holdings and recent market conditions and the fund's investment strategies that affected performance.

For a free copy of any of these documents or to request other information or ask questions about the fund, call Fidelity at 1-877-208-0098. In addition, you may visit Fidelity's web site at www.advisor.fidelity.com for a free copy of a prospectus, SAI, or annual or semi-annual report or to request other information.

The SAI, the fund's annual and semi-annual reports and other related materials are available from the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) Database on the SEC's web site (<http://www.sec.gov>). You can obtain copies of this information, after paying a duplicating fee, by sending a request by e-mail to publicinfo@sec.gov or by writing the Public Reference Section of the SEC, Washington, D.C. 20549-1520. You can also review and copy information about the fund, including the fund's SAI, at the SEC's Public Reference Room in Washington, D.C. Call 1-202-551-8090 for information on the operation of the SEC's Public Reference Room.

Investment Company Act of 1940, File Number, 811-05361

FDC is a member of the Securities Investor Protection Corporation (SIPC). You may obtain information about SIPC, including the SIPC brochure, by visiting www.sipc.org or calling SIPC at 202-371-8300.
