APPENDIX A—HYPOTHETICAL INVESTMENT AND EXPENSE INFORMATIONA-1

SUMMARY INFORMATION

AllianceBernstein VPS Money Market Portfolio

INVESTMENT OBJECTIVE

The Portfolio's investment objective is maximum current income to the extent consistent with safety of principal and liquidity.

FEES AND EXPENSES OF THE PORTFOLIO

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. The operating expenses information below is designed to assist Contractholders of variable products that invest in the Portfolio in understanding the fees and expenses that they may pay as an investor. Because the information does not reflect deductions at the separate account level or contract level for any charges that may be incurred under a contract, Contractholders that invest in the Portfolio should refer to the variable contract prospectus for a description of fees and expenses that apply to Contractholders. Inclusion of these charges would increase the fees and expenses provided below.

Shareholder Fees (fees paid directly from your investment)

N/A

Annual Portfolio Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	.45%
Other Expenses	.43%
Total Portfolio Operating Expenses	.88%

Examples

The Examples are intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year and that the Portfolio's operating expenses stay the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

After 1 Year	\$ 90
After 3 Years	\$ 281
After 5 Years	\$ 488
After 10 Years	\$1,084

PRINCIPAL STRATEGIES

The Portfolio is a "money market fund" that seeks to maintain a stable net asset value, or NAV, of \$1.00 per share although there is no guarantee that the Portfolio will maintain a NAV of \$1.00 per share. The Portfolio invests in a portfolio of high-quality, U.S. Dollar-denominated money market securities.

The Portfolio may invest in:

- marketable obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities, including obligations that are issued by private issuers that are guaranteed as to principal or interest by the U.S. government, its agencies or instrumentalities;
- certificates of deposit and bankers' acceptances issued or guaranteed by, or time deposits maintained at, banks or savings and loan associations (including foreign branches of U.S. banks or U.S. or foreign branches of foreign banks) having total assets of more than \$500 million;
- high-quality commercial paper (or, if not rated, commercial paper determined by the Adviser to be of comparable quality) issued by U.S. or foreign companies and participation interests in loans made to companies that issue such commercial paper;
- adjustable rate obligations;

- asset-backed securities;
- restricted securities (*i.e.*, securities subject to legal or contractual restrictions on resale); and
- repurchase agreements that are fully collateralized.

The Portfolio may also invest up to 25% of its net assets in money market instruments issued by foreign branches of foreign banks.

As a money market fund, the Portfolio must meet the requirements of Securities and Exchange Commission (“Commission”) Rule 2a-7. The Rule imposes strict conditions on the investment quality, maturity, and diversification of the Portfolio’s investments. Among other things, Rule 2a-7 requires that the Portfolio’s investments have (i) a remaining maturity of no more than 397 days unless otherwise permitted by Rule 2a-7, (ii) a weighted average maturity that does not exceed 60 days, and (iii) a weighted average life that does not exceed 120 days. Rule 2a-7 imposes daily and weekly liquidity standards that require the Portfolio to hold investments of at least 10% and 30% of its total assets, respectively, in liquid assets as defined in Rule 2a-7. Rule 2a-7 also limits the Portfolio’s investments in illiquid securities to 5% of its total assets.

PRINCIPAL RISKS

- **Money Market Fund Risk:** Money market funds are sometimes unable to maintain an NAV at \$1.00 per share and, as it is generally referred to, “break the buck”. In that event, an investor in a money market fund would, upon redemption, receive less than \$1.00 per share. The Portfolio’s shareholders should not rely on or expect an affiliate of the Portfolio to purchase distressed assets from the Portfolio, make capital infusions, enter into credit support agreements or take other actions to prevent the Portfolio from breaking the buck. In addition, you should be aware that significant redemptions by large investors in the Portfolio could have a material adverse effect on the Portfolio’s other shareholders. The Portfolio’s NAV could be affected by forced selling during periods of high redemption pressures and/or illiquid markets.
- **Interest Rate Risk:** Changes in interest rates will affect the yield and value of the Portfolio’s investments in short-term securities. A decline in interest rates will affect the Portfolio’s yield as these securities mature or are sold and the Portfolio purchases new short-term securities with lower yields. Generally, an increase in interest rates causes the value of a debt instrument to decrease. The change in value for shorter-term securities is usually smaller than for securities with longer maturities. In addition, if interest rates remain low for an extended period of time, the Portfolio may have difficulties in maintaining a positive yield, paying expenses out of the Portfolio’s assets, or maintaining a stable \$1.00 NAV.
- **Credit Risk:** Credit risk is the possibility that a security’s credit rating will be downgraded or that the issuer of the security will default (fail to make scheduled interest and principal payments). Credit quality can change rapidly in certain market environments and the default of a single holding could have the potential to cause significant NAV deterioration.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be less liquid due to adverse market, economic, political, regulatory or other factors.
- **Liquidity Risk:** Liquidity risk exists when particular investments are difficult to purchase or sell, which may prevent the Portfolio from selling out of these securities at an advantageous time or price.
- **Management Risk:** The Portfolio is subject to management risk because it is an actively managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions for the Portfolio, but there is no guarantee that its techniques will produce the intended results.

An investment in the Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Portfolio seeks to preserve the value of your investment at \$1.00 per share, it is possible that you may lose money by investing in the Portfolio.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Portfolio by showing:

- how the Portfolio’s performance changed from year to year over ten years; and
- the Portfolio’s average annual returns for one, five and ten years.

You may obtain updated performance information on the Portfolio's website at www.AllianceBernstein.com (click on "Pricing & Performance").

The performance information does not take into account separate account charges. If separate account charges were included, an investor's return would be lower. The Portfolio's past performance, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

During the period shown in the bar chart, the Portfolio's:

Best Quarter was up 1.32%, 1st quarter, 2001; and Worst Quarter was up 0.0024%, 3rd and 4th quarter, 2009.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2010)

	1 Year	5 Years	10 Years
Portfolio	0.01%	2.11%	1.88%

You may obtain the most current seven-day yield information of the Portfolio by calling 800-221-5672 or your financial intermediary.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Portfolio.

- **PURCHASE AND SALE OF PORTFOLIO SHARES**

The Portfolio offers its shares through the separate accounts of life insurance companies (“Insurers”). You may only purchase and sell shares through these separate accounts. See the prospectus of the separate account of the participating insurance company for information on the purchase and sale of the Portfolio’s shares.

- **TAX INFORMATION**

The Portfolio may make income dividends or capital gains distribution. The income and capital gains distribution are expected to be made in shares of the Portfolio. See the prospectus of the separate account of the participating insurance company for federal income tax information.

- **PAYMENTS TO INSURERS AND OTHER FINANCIAL INTERMEDIARIES**

If you purchase shares of the Portfolio through an Insurer or other financial intermediary, the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the Insurer or other financial intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

INVESTING IN THE PORTFOLIO

HOW TO BUY AND SELL SHARES

The Portfolio offers its shares through the separate accounts of life insurance companies (the “Insurers”). You may only purchase and sell shares through these separate accounts. See the prospectus of the separate account of the participating insurance company for information on the purchase and sale of the Portfolio’s shares. AllianceBernstein Investments, Inc. (“ABI”) may from time to time receive payments from Insurers in connection with the sale of the Portfolio’s shares through the Insurer’s separate accounts.

The purchase or sale of the Portfolio’s shares is priced at the next determined NAV after the order is received in proper form.

The Insurers maintain omnibus account arrangements with the Fund in respect of the Portfolio and place aggregate purchase, redemption and exchange orders for shares of the Portfolio corresponding to orders placed by the Insurer’s customers (“Contractholders”) who have purchased contracts from the Insurers, in each case, in accordance with the terms and conditions of the relevant contract. Omnibus account arrangements maintained by the Insurers are discussed below under “Limitations on Ability to Detect and Curtail Excessive Trading Practices”.

ABI may refuse any order to purchase shares. The Portfolio reserves the right to suspend the sale of its shares to the public in response to conditions in the securities markets or for other reasons.

PAYMENTS TO FINANCIAL INTERMEDIARIES

Financial intermediaries, such as the Insurers, market and sell shares of the Portfolio and typically receive compensation for selling shares of the Portfolio. This compensation is paid from various sources.

Insurers or your financial intermediary receive compensation from ABI and/or the Adviser in several ways from various sources, which include some or all of the following:

- defrayal of costs for educational seminars and training;
- additional distribution support; and
- payments related to providing Contractholder record-keeping and/or administrative services.

ABI and/or the Adviser may pay Insurers or other financial intermediaries to perform record-keeping and administrative services in connection with the Portfolio. Such payments will generally not exceed 0.35% of the average daily net assets of the Portfolio attributable to the Insurer.

Other Payments for Educational Support and Distribution Assistance

In addition to the fees described above, ABI, at its expense, currently provides additional payments to the Insurers that sell

shares of the Portfolio. These sums include payments to reimburse directly or indirectly the costs incurred by the Insurers and their employees in connection with educational seminars and training efforts about the Portfolio for the Insurers’ employees and/or their clients and potential clients. The costs and expenses associated with these efforts may include travel, lodging, entertainment and meals.

For 2011, ABI’s additional payments to these firms for educational support and distribution assistance related to the Portfolios are expected to be approximately \$400,000. In 2010, ABI paid additional payments of approximately \$400,000 for the Portfolios.

If one mutual fund sponsor that offers shares to separate accounts of an Insurer makes greater distribution assistance payments than another, the Insurer may have an incentive to recommend or offer the shares of funds of one fund sponsor over another.

Please speak with your financial intermediary to learn more about the total amounts paid to your financial intermediary by the Adviser, ABI and by other mutual fund sponsors that offer shares to Insurers that may be recommended to you. You should also consult disclosures made by your financial intermediary at the time of purchase.

As of the date of this Prospectus, ABI anticipates that the Insurers or their affiliates that will receive additional payments for educational support include:

AIG SunAmerica
Genworth Financial
Lincoln Financial Distributors
Pacific Life Insurance Co.
Prudential
RiverSource Distributors
SunLife Financial
The Hartford
Transamerica Capital

Although the Portfolio may use brokers and dealers who sell shares of the Portfolio to effect portfolio transactions, the Portfolio does not consider the sale of AllianceBernstein Mutual Fund shares as a factor when selecting brokers or dealers to effect portfolio transactions.

FREQUENT PURCHASES AND REDEMPTIONS OF PORTFOLIO SHARES

The Fund’s Board has adopted policies and procedures designed to detect and deter frequent purchases and redemptions of Portfolio shares or excessive or short-term trading that may disadvantage long-term Contractholders. These policies are

described below. There is no guarantee that the Portfolio will be able to detect excessive or short-term trading or to identify Contractholders engaged in such practices, particularly with respect to transactions in omnibus accounts. Contractholders should be aware that application of these policies may have adverse consequences, as described below, and avoid frequent trading in Portfolio shares through purchases, sales and exchanges of shares. The Portfolio reserves the right to restrict, reject, or cancel, without any prior notice, any purchase or exchange order for any reason, including any purchase or exchange order accepted by any Insurer or a Contractholder's financial intermediary.

Risks Associated With Excessive Or Short-Term Trading Generally. Money market funds, such as the Portfolio, generally are not effective vehicles for short-term trading activity, and therefore the risks relating to short-term trading activity are correspondingly lower for the Portfolio. However, the AllianceBernstein Mutual Funds will generally try to prevent market timing by utilizing the procedures described below. These procedures may not be successful in identifying or stopping excessive or short-term trading in all circumstances. By realizing profits through short-term trading, Contractholders that engage in rapid purchases and sales or exchanges of a Portfolio's shares dilute the value of shares held by long-term Contractholders. Volatility resulting from excessive purchases and sales or exchanges of shares of the Portfolio, especially involving large dollar amounts, may disrupt efficient portfolio management and cause the Portfolio to sell portfolio securities at inopportune times to raise cash to accommodate redemptions relating to short-term trading activity. In particular, the Portfolio may have difficulty implementing its long-term investment strategies if it is forced to maintain a higher level of its assets in cash to accommodate significant short-term trading activity. In addition, the Portfolio may incur increased administrative and other expenses due to excessive or short-term trading and increased brokerage costs.

Investments in securities of foreign issuers may be particularly susceptible to short-term trading strategies. This is because securities of foreign issuers are typically traded on markets that close well before the time a Portfolio calculates its NAV at 4:00 p.m., Eastern Time, which gives rise to the possibility that developments may have occurred in the interim that would affect the value of these securities. The time zone differences among international stock markets can allow a Contractholder engaging in a short-term trading strategy to exploit differences in share prices that are based on closing prices of securities of foreign issuers established some time before the Portfolio calculates its own share price (referred to as "time zone arbitrage").

Contractholders engaging in a short-term trading strategy may also target a Portfolio that does not invest primarily in securities of foreign issuers. If the Portfolio invests in securities that are, among other things, thinly traded, traded infrequently, or relatively illiquid, it has the risk that the current market price for the securities may not accurately reflect current market values. Contractholders may seek to engage in short-term trading to take advantage of these pricing differences (referred to as "price arbitrage").

Policy Regarding Short-Term Trading. Purchases and exchanges of shares of the Portfolio should be made for investment purposes only. The Fund seeks to prevent patterns of excessive purchases and sales or exchanges of shares of the Portfolio. The Fund seeks to prevent such practices to the extent they are detected by the procedures described below, subject to the Fund's ability to monitor purchase, sale and exchange activity. Insurers utilizing omnibus account arrangements may not identify to the Fund, ABI or AllianceBernstein Investor Services, Inc. ("ABIS") Contractholders' transaction activity relating to shares of the Portfolio on an individual basis. Consequently, the Fund, ABI and ABIS may not be able to detect excessive or short-term trading in shares of the Portfolio attributable to a particular Contractholder who effects purchase and redemption and/or exchange activity in shares of the Portfolio through an Insurer acting in an omnibus capacity. In seeking to prevent excessive or short-term trading in shares of the Portfolio, including the maintenance of any transaction surveillance or account blocking procedures, the Fund, ABI and ABIS consider the information actually available to them at the time. The Fund reserves the right to modify this policy, including any surveillance or account blocking procedures established from time to time to effectuate this policy, at any time without notice.

- **Transaction Surveillance Procedures.** The Fund, through its agents, ABI and ABIS, maintains surveillance procedures to detect excessive or short-term trading in Portfolio shares. This surveillance process involves several factors, which include scrutinizing individual Insurer's omnibus transaction activity in Portfolio shares in order to seek to ascertain whether any such activity attributable to one or more Contractholders might constitute excessive or short-term trading. Insurer's omnibus transaction activity identified by these surveillance procedures, or as a result of any other information actually available at the time, will be evaluated to determine whether such activity might indicate excessive or short-term trading activity attributable to one or more Contractholders. These surveillance procedures may be modified from time to time, as necessary or appropriate to improve the detection of excessive or short-term trading or to address specific circumstances.
- **Account Blocking Procedures.** If the Fund determines, in its sole discretion, that a particular transaction or pattern of transactions identified by the transaction surveillance procedures described above is excessive or short-term trading in nature, the relevant Insurer's omnibus account(s) will be immediately "blocked" and no future purchase or exchange activity will be permitted, except to the extent the Fund, ABI or ABIS has been informed in writing that the terms and conditions of a particular contract may limit the Fund's ability to apply its short-term trading policy to Contractholder activity as discussed below. As a result, any Contractholder seeking to engage through an Insurer in purchase or exchange activity in shares of the Portfolio under a particular contract will be prevented from doing so. However, sales of Portfolio shares back to the Portfolio or redemptions will continue to be permitted in accordance

with the terms of the Portfolio's current Prospectus. In the event an account is blocked, certain account-related privileges, such as the ability to place purchase, sale and exchange orders over the internet or by phone, may also be suspended. As a result, unless the Contractholder redeems his or her shares, the Contractholder effectively may be "locked" into an investment in shares of one or more of the Portfolio that the Contractholder did not intend to hold on a long-term basis or that may not be appropriate for the Contractholder's risk profile. To rectify this situation, a Contractholder with a "blocked" account may be forced to redeem Portfolio shares, which could be costly if, for example, these shares have declined in value. To avoid this risk, a Contractholder should carefully monitor the purchases, sales, and exchanges of Portfolio shares and avoid frequent trading in Portfolio shares. An Insurer's omnibus account that is blocked will generally remain blocked unless and until the Insurer provides evidence or assurance acceptable to the Fund that one or more Contractholders did not or will not in the future engage in excessive or short-term trading.

- **Applications of Surveillance Procedures and Restrictions to Omnibus Accounts.** The Portfolio applies its surveillance procedures to Insurers. As required by

Commission rules, the Portfolio has entered into agreements with all of its financial intermediaries that require the financial intermediaries to provide the Portfolio, upon the request of the Portfolio or its agents, with individual account level information about their transactions. If the Portfolio detects excessive trading through its monitoring of omnibus accounts, including trading at the individual account level, Insurers will also execute instructions from the Portfolio to take actions to curtail the activity, which may include applying blocks to account to prohibit future purchases and exchanges of Portfolio shares.

HOW THE PORTFOLIO VALUES ITS SHARES

The Portfolio's NAV, which is the price at which shares of the Portfolio are purchased and redeemed, is expected to be constant at \$1.00 share, although this value is not guaranteed. The NAV is calculated at 4:00 p.m., Eastern Time, each day the New York Stock Exchange (the "Exchange") is open for business. The Portfolio values its securities at their amortized cost. This method involves valuing an instrument at its cost and thereafter applying a constant amortization to maturity of any discount or premium, regardless of the impact of fluctuating interest rates on the market value of the investment.

MANAGEMENT OF THE PORTFOLIO

INVESTMENT ADVISER

The Portfolio's adviser is AllianceBernstein L.P., 1345 Avenue of the Americas, New York, New York 10105. The Adviser is a leading international investment adviser managing client accounts with assets as of December 31, 2010, totaling more than \$478 billion (of which over \$84 billion represented assets of registered investment companies sponsored by the Adviser). As of December 31, 2010, the Adviser managed retirement assets for many of the largest public and private employee benefit plans (including 31 of the nation's FORTUNE 100 companies), for public employee retirement funds in 35 states, for investment companies, and for foundations, endowments, banks and insurance companies worldwide. Currently, there

are 35 registered investment companies managed by the Adviser, comprising 115 separate investment portfolios, with approximately 3.3 million retail accounts.

The Adviser provides investment advisory services and order placement facilities for the Portfolio. For these advisory services, for the fiscal year ended December 31, 2010, the Portfolio paid the Adviser as a percentage of average daily net assets .45%.

A discussion regarding the basis for the Board's approval of the Portfolio's investment advisory agreement is available in the Portfolio's annual report to shareholders for the fiscal year ended indicated above.

DIVIDENDS, DISTRIBUTIONS AND TAXES

The Portfolio declares income dividends each business day at 4:00 p.m., Eastern Time. The dividends are paid monthly via automatic investment in additional full and fractional shares. As these additional shares are entitled to income, a compounding of income occurs.

See the prospectus of the separate account of the participating insurance company for federal income tax information.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Portfolio's financial performance for the past 5 years. Certain information reflects financial results for a single share of a class of the Portfolio. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Portfolio (assuming reinvestment of all dividends and distributions). The total returns in the table do not take into account separate account charges. If separate account charges were included, an investor's returns would have been lower. This information has been audited by Ernst & Young LLP, the independent registered public accounting firm for the Portfolio, whose report, along with the Portfolio's financial statements, are included in the Portfolio's annual report, which is available upon request.

AllianceBernstein Money Market Portfolio

	Year Ended December 31,				
	2010	2009	2008	2007	2006
Net asset value, beginning of period	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00
Income From Investment Operations					
Net investment income	.00(a)(b)	.00(a)(b)	.02	.04	.04
Less: Dividends					
Dividends from net investment income	.00(a)	.00(a)	(.02)	(.04)	(.04)
Net asset value, end of period	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00
Total Return					
Total investment return based on net asset value(c)	.01%	.17%	1.90%	4.35%	4.22%
Ratios/Supplemental Data					
Net assets, end of period (000's omitted)	\$19,269	\$25,318	\$28,520	\$23,610	\$27,087
Ratio to average net assets of:					
Expenses, net of waivers and reimbursements	.26%(d)	.66%	.96%	.99%	.93%(d)
Expenses, before waivers and reimbursements	.88%(d)	.90%	.96%	.99%	.93%(d)
Net investment income	.01%(b)(d)	.18%(b)	1.85%	4.28%	4.13%(d)

Footnotes:

(a) Amount is less than \$.01 per share.

(b) Net of expenses reimbursed or waived by the Adviser and/or the Distributor.

(c) Total investment return is calculated assuming an initial investment made at the NAV at the beginning of the period, reinvestment of all dividends and distributions at the NAV during the period, and redemption on the last day of the period. Total return does not reflect (i) insurance company's separate account related expense charges and (ii) the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. Total investment return calculated for a period of less than one year is not annualized.

(d) The ratio includes expenses attributable to costs of proxy solicitation.

APPENDIX A

Hypothetical Investment and Expense Information

The settlement agreement between the Adviser and the New York Attorney General requires the Portfolio to include the following supplemental hypothetical investment information that provides additional information calculated and presented in a manner different from expense information found under “Fees and Expenses of the Portfolio” in this Prospectus about the effect of the Portfolio’s expenses, including investment advisory fees and other Portfolio costs, on the Portfolio’s returns over a 10-year period. Except as otherwise indicated, the chart shows the estimated expenses that would be charged on a hypothetical investment of \$10,000 in Class A shares of the Portfolio assuming a 5% return each year. The chart also assumes that the current annual expense ratio stays the same throughout the 10-year period. The current annual expense ratio for the Portfolio is the same as stated under “Fees and Expenses of the Portfolio.” There are additional fees and expenses associated with variable products. These fees can include mortality and expense risk charges, administrative charges, and other charges that can significantly affect expenses. These fees and expenses are not reflected in the following expense information. Your actual expenses may be higher or lower.

AllianceBernstein Money Market Portfolio

Year	Hypothetical Investment	Hypothetical Performance Earnings	Investment After Returns	Hypothetical Expenses	Hypothetical Ending Investment
1	\$10,000.00	\$ 500.00	\$10,500.00	\$ 92.40	\$10,407.60

10	14,327.00	716.35	15,043.35	132.38	14,910.97
Cumulative		\$6,024.26		\$1,113.30	

For more information about the Portfolio, the following documents are available upon request:

- **ANNUAL/SEMI-ANNUAL REPORTS TO CONTRACTHOLDERS**

The Portfolio's annual and semi-annual reports to Contractholders contain additional information on the Portfolio's investments. In the annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Portfolio's performance during its last fiscal year.

- **STATEMENT OF ADDITIONAL INFORMATION (SAI)**

The Fund has an SAI, which contains more detailed information about the Portfolio, including its operations and investment policies. The Fund's SAI and the independent registered public accounting firm's report and financial statements in the Portfolio's most recent annual report to Contractholders are incorporated by reference into (and are legally part of) this Prospectus.

You may request a free copy of the current annual/semi-annual report or the SAI, or make inquiries concerning the Portfolio, by contacting your broker or other financial intermediary, or by contacting the Adviser:
